The sanitary department advises that the entire island is free of quarantinable diseases.

Report from Matanzas—Inspection of vessels—Epidemic measles—Scarlet fever—Leprosy.

Acting Assistant Surgeon Nuñez reports, April 26:

Week ended April 24. Bills of health issued to 6 vessels leaving for United States ports.

The local epidemic of measles is on the increase, although no deaths from the disease have been reported. Scarlet fever has again made its appearance in the city district known as Pueblo Nuevo. Proper sanitary measures are reported as being taken to prevent the spread of these diseases.

With the exception of 1 death from leprosy, no quarantinable diseases were reported for the 10 days ended April 20.

Report from Santiago—Inspection of vessels—Leprosy.

Acting Assistant Surgeon Wilson reports, April 21:

Week ended April 17. Bills of health issued to 7 vessels bound for the United States and its dependencies.

The United States gunboat *Dubuque*, going to the Guantanamo Naval Station via the Target Range was given bill of health, by request.

No new case of quarantinable disease has been reported. The 3 cases of leprosy previously reported are still under treatment. (See Public Health Reports, April 16, 1909, page 497.)
